

## ◀ *Education* ▶

University of Michigan-Ann Arbor  
MDes in Integrative Design • May 2022

University of Wisconsin-Madison  
B.S. Computer Science • May 2020

## ◀ *Research* ▶

› ORBIT: Web Tool for Collaborative Remote  
Intercultural Teams

Graduate Research Assistant • University of  
Michigan • Fall 2020 – present

- Analyzed survey data from a local middle school to produce design considerations for a future ORBIT version for middle school students.
- Updated and maintained ORBIT web tool

› Crisis Couture: An Empirical Study on  
Motivations and Practices of Mask Makers During  
a Crisis

Undergraduate Research Intern • Microsoft  
Research • Summer 2020

- Conducted a mixed methods study of mask makers during the COVID-19 pandemic on their attitudes and reflections on their mask making processes, their unique innovations, and the meaning of contributing in an impactful manner in local and global communities.

› (Don't) Touch My Hair: Exploring Consent  
through Interactive Art

Undergraduate Research Intern • Object-Based  
Media Group @ MIT Media Lab • Summer 2019

- Designed an interactive sculpture of a black woman with an Afro that taught users how to respectfully explore their curiosities about black hair and learn the sensitivity of black women concerning their hair.

## ◀ *Professional Skills* ▶

Web Programming • Wireframing • Prototyping •  
Interviewing • User Experience Research • Figma

## ◀ *Awards and Honors* ▶

- Ronald E. McNair Scholar
- MIT Summer Research Program Alumnus
- 2018 AnitaB.org GHC Scholar
- Best Beginner Hack at BuildHer Hackathon • April 2018
- Chancellor's Scholar • Fall 2016 – Spring 2020
  - Served as Contact Co-Chair and held the responsibility of keeping in contact with 60+ students, managing social media pages, and coordinating get-to-know-you activities.
- Undergraduate Research Scholar • Fall 2016 – Spring 2017

## ◀ *Work Experience* ▶

› UI/UX Researcher & Designer

Fall 2020 – present • MCubed Project

- Designed various prototypes for an electronic health record (EHR) application to facilitate management of heart failure care. Conducted usability tests with healthcare providers to improve and inform the prototype design.

› Student Web Application Developer

May 2018 – May 2020 • OVCERGE - IT

- Developed and designed various pages for web applications used by the graduate school faculty and staff for admissions using C# and SQL

## ◀ *Projects* ▶

› bARaids

Fall 2020

- Prototyped an AR-enabled hair accessory that can be braided into someone's hair and whose patterns can be read in an app to reveal the wearer's hair story.

› Pink Tax

Summer 2018

- Developed a Java program that calculates the "pink tax", added value to a product that is marketed towards women, of a user's purchase at checkout

› Thought Jar

Spring 2018

- Co-developed a mobile app that poses thought provoking questions for the user who wants to practice critical thinking and an intentional interaction with technology
